

# MY PROJECT

My Note taking application

---

Hubertas Varanauskas

<https://github.com/HubTakenIs/cs-final>

- My academic question changed to Can a note taking app that implements spaced repetition help students study?
- I managed to complete the literature review
- Designed and created an application to attempt an experiment
- I hosted my application at <https://hubv.co.uk>
- I didn't manage to do the experiment because of time constraints.

- In my literature review I have identified a few key gaps in research:
  - Current note taking application do not incorporate revision strategies or spaced repetition
  - Note quality is more important than quantity but note taking apps do not incorporate strategies to help students take better notes
  - Note taking apps do not encourage/ motivate

**ANY QUESTIONS?**
